**Detailed Action**

***Response to Amendment***

Claims 1-12 and 16-20 are pending. This action is in response to the amendment received August 31, 2005.

***Response to Arguments***

The rejection of claims 1-12 and 16-20 under 35 U.S.C. 103(a) as being unpatentable over Hirka et al. (US publication no. 2003/0061157) in view of Star (US publication no. 2003/0216990) is maintained.

Applicant's arguments filed August 31, 2005 have been fully considered but they are not persuasive.

In response to the arguments concerning the previously rejected claims the following comments are made:

A.) In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

B.) Applicant alleges that the prior art made of record fails to teach a primary user assigns a PIN number to an account limit to at least one secondary user and the secondary user is a family member of the primary user. The examiner disagrees with applicant's representative since Star teaches a primary user assigns a PIN number to an account limit to at least one secondary user and the secondary user is a family

Art Unit: 3624

member of the primary user (para. 0009, 0027, and 0040). In other words, Star teaches each account can have a pin number and a root user that is capable of creating sub accounts on the server, each sub account having different levels of user privileges. Also, his system allows multiple users to share the same account with one main user has total authority. Thus, it would have been obvious to one of ordinary skill in the art at the time of applicant's invention to enable primary user to assign an account limit and pin number to the secondary user because it provides a mean of performing integrated financial transactions with multiple privileges for users. Furthermore, both Hirka and Star teach financial accounts and transaction for lending institution or in relation to the Internet.

With regards to the claims rejected as obvious over Hirka and Star, the examiner would like to point out that the references teach the claimed limitations and thus provides adequate support for the claimed limitations. Therefore, the examiner maintains that Hirka and Star teach the claimed limitations.

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3624

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
